Dear Hiring Manager,

I am interested in the Software Development Intern position , which i learned about from linkedin.

For over a year i have been working extensively with Python, Django and PostgreSql and also acquired other relevant skills including Heroku and AWS S3. I have used these skills to create relevant projects that integrate external APIs, solve outreach problems, provide distribution solutions, i have also worked with teams which we had zero communication problems

I would very much like to part of the organization , if you have any questions or would like to set up a time to talk, please reach out. I look forward to hearing from you soon.

Sincerely,

Muyiwa Alashi
